DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/17/2008 has been entered.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

4. Claims 36 and 43-47 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Anderson et al. (USP 6,880,722 [see PCT PUB date: May 10, 2002]).

Regarding claim 36, Anderson et al. disclose a method of coiling a medicament carrier in preparation for loading the coiled medicament carrier into a housing of a medicament dispenser, said carrier having the form of an elongate strip and having multiple distinct medicament doses carried thereby, the method comprising:

- (a) receiving the leading end of the elongate medicament carrier by a spindle (see column 19 lines 30-33); and
- (b) forming a coil of the elongate medicament carrier with the medicament doses therein on the spindle by rotating the spindle whilst moving the spindle and the elongate medicament carrier in a lateral sense (see column 19 lines 30-33).

Regarding claim 43, Anderson et al. disclose a method according to claim 36, wherein the medicament carrier comprises blister pack form (see Figure 4).

Regarding claim 44, Anderson et al. disclose a method according to claim 43, wherein the medicament carrier comprises a peelable blister strip comprising a base sheet, in which blisters are formed to define pockets therein for containing distinct medicament dose portions, and a lid sheet which is hermetically sealed to the base sheet except in the region of the blisters in such a manner that the lid sheet and the base sheet can be peeled apart (see Figure 4).

Regarding claim 45, Anderson et al. disclose a method according to claim 36 comprising associating the coiled medicament carrier with a retainer for retaining the

coiled form (see Figure 5a).

Regarding claim 46, Anderson et al. disclose a method of coiling according to claim 36, where in the spindle frictionally engages the elongate medicament carrier.

Regarding claim 47, Anderson et al. disclose a method of coiling according to claim 36. However, he does not disclose a step wherein the end of the elongate medicament carrier is received within a slit provided to the spindle. Yet, the selection of a known material based upon its suitability for the intended use is a design consideration within the skill of the art. In re Leshin, 227 F.2d 197, 125 USPQ 416 (CCPA 1960).

Response to Arguments

5. Applicant's arguments with respect to claims 36 and 43-47 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
